Other Advices

Start to build up your resume

- Utilize your summer time for internship
- Try to be a Teaching Assistant if possible

Start to learn GitHub

If you want, we can have a programming workshop each week.

Once a week - coding challenge

Discussion

How can students best prepare for online interviews? How do they differ from in-person interviews?

Practice and mock interviews help a lot. Besides, it would be better to do some research about the companies' culture before the interview.

Your facial expression and body language influence somehow got lessened. So it would be better if you practice towards the mirror or record your mock interview then replay it to see where to improve.

Website: LeetCode, HackerRank

Discussion about Online Mentoring Agreement
